CLASSIFIED DOCUMENT

Project: Operation Quantum Shield
Classification: TOP SECRET
Date: 2026-09-24

This document contains sensitive information regarding the deployment of quantum-safe cryptographic proto

Section 1: Threat Assessment
Current quantum computing capabilities pose an emerging threat to classical cryptographic systems includin

Section 2: Migration Plan
Phase 1: Key infrastructure audit and algorithm selection
Phase 2: ML-KEM deployment for key establishment
Phase 3: ML-DSA deployment for digital signatures
Phase 4: Legacy system decommission

Section 3: Budget Allocation
Total estimated cost: $4.2M
Timeline: 18-24 months

Distribution: AUTHORIZED PERSONNEL ONLY

APPENDIX A: Technical Specifications

Encryption: AES-256-GCM
Key Encapsulation: ML-KEM-768 (FIPS 203)
Digital Signatures: ML-DSA-65 (FIPS 204)
Hash: SHA-256 / SHA-3-256

All cryptographic operations must be performed in FIPS-validated modules.
Key material must never leave the secure enclave.

APPENDIX B: Authorized Recipients

1. Recipient Alpha - Security Operations
2. Recipient Beta - Infrastructure Team
3. Recipient Gamma - Compliance Office

Each recipient must verify document integrity upon receipt.
Any suspected compromise must be reported within 24 hours.
